SUMMARY

Product engineer, 22. I design the interface and write the software, real live products, not prototypes. TRACE is live on the App Store in the US; Kiblo is in App Store review for the US and Canada; Dross is a notarized Mac app; BlockFlow's voice agent is in production (not a sales push like Kiblo). I post what I build. TypeScript, React Native / Expo, Next.js, Node, SwiftUI, IAP.

SELECTED PRODUCTS

Kiblo — Pet-food iOS app (scan, portions, reorder)

Solo · design + code | Cursor, Claude, Expo, React Native, Firebase, RevenueCat | App Store review — US & Canada (not live yet)

- **Working consumer loop:** exact-GTIN barcode scan, Waltham portions, home UI I locked, Chewy / Amazon reorder, Plus (multi-dog, trends, rule-based feeding tips). I set constraints, review, ship.

Dross — macOS app and CLI for contract drift

Solo | SwiftUI, TypeScript compiler API, Ed25519 | Live — notarized DMG v0.1 | github.com/lopezsellesarnau-cmd/dross

- **Finds client/server mismatch, dead exports, env drift, demo data in production.** Same engine in the Mac app and CI CLI. Eval at 100% precision and recall on the golden corpus.

TRACE — Privacy and data-removal iOS app

Solo full-stack | React Native, Expo, Node.js, Firebase, RevenueCat, Resend | Live — App Store US (not Canada)

- **App and API:** breach scan, Exposure Score, GDPR / CCPA removal to 24 US brokers. Shareable report card; delete account removes Firestore, not only Auth.

BlockFlow — SaaS voice AI for UK property managers

Solo | Next.js, Supabase, voice AI, LLM | In production — not selling / no paying customers

- **Out-of-hours voice agent:** conversation, urgency/type, structured ticket. Happy path with no human. Live calls. Unlike Kiblo, I am not distributing or selling this now.

EXPERIENCE

Deutsche Post (DHL Group) — Logistics and operations

Paderborn, Germany | Aug 2024–Apr 2026 (~2 years)

- **Lived and worked in Germany in operations.** English-speaking product roles in Berlin / NL; German is A2, not fluent technical German.

ADDITIONAL SHIPPED WORK

Authority (EU AI Act, technical build). Louvr Labs (Meta Ads ranking). SMASH (padel iOS, App Store). Volea (Stripe Connect). F1 Strategy Agent and ai-act-eval (open source). Short-form video of builds; the F1 repo went public after viewers asked for the code.

TECHNICAL SKILLS

Design and frontend: design systems, UI, Figma to code, React, React Native, Expo, Next.js, SwiftUI, Flutter.

Languages: TypeScript, JavaScript, Python, Swift, Dart, SQL.

Backend and cloud: Node.js, Express, Firebase, Firestore, Supabase, Vercel, Render, REST APIs.

AI and product: Claude API, Cursor, LLM orchestration, RAG, agents, voice AI, evals, App Store, RevenueCat, Stripe, GDPR, EU AI Act.

CERTIFICATIONS AND LANGUAGES

Google Cloud (Aug 2026): Introduction to Generative AI; Introduction to Large Language Models; Introduction to Responsible AI. Spanish (native), Catalan (native), English (professional), German (A2).

INTERESTS

Padel, technology, architecture, geopolitics. Based in Alcoy, Spain. Open to relocating to the Netherlands and Germany; UK when the employer sponsors.
